# Gabriel Hermont

Belo Horizonte, Minas Gerais • (31) 99202-1581 • gabrielsjh2007@gmail.com • linkedin.com/in/gbhermont • https://hermont.dev

Currently at the beginning of my degree, I have found myself more and more at home in this digital world. I look for projects that introduce me not only to the technology field, but also to new ways of thinking and solving real problems in the world around us. I always focus on growing and using skills such as logical reasoning, critical thinking, and thinking outside the box to achieve increasingly surprising results!

In addition, I make use of a wide range of AI tools in this process, understanding how they can increase my productivity and knowledge by working with me, not for me.

## WORK EXPERIENCE

**TechBiz Forense Digital** **• Belo Horizonte, Minas Gerais, Brazil • 03/2026 - Present**
**Apprentice in Technology and Information Security**

- I currently work as a Young Apprentice at TechBiz Forense Digital, where I have direct contact with physical servers and cloud computing based on AWS and Microsoft 365. I also work on IT asset inventory management and control, providing support for software and hardware maintenance. I am always looking to expand knowledge bases, upskill, and produce technical documentation.
  On a daily basis, I handle user support, problem solving, and teamwork, and I follow and learn about best practices in Information Security and Technology.
- I take part in the Conecta TechBiz Project, a system developed in-house to meet the needs and CSC services of the TechBiz group. I contribute to the product's Quality Assurance by testing and validating requirements. I am also responsible for fixing the errors found in the code, acting as a developer. I aim to grow within the project and develop new requirements.

## EDUCATION
